Eaton Vance Corp. Report for the Three and Six Month Periods Ended April 30, 2020

Boston, MA, May 20, 2020 – Eaton Vance Corp. (NYSE: EV) today reported earnings per diluted share of \$0.65 for the second quarter of fiscal 2020, a decrease of 27 percent from \$0.89 of earnings per diluted share in the second quarter of fiscal 2019 and a decrease of 29 percent from \$0.91 of earnings per diluted share in the first quarter of fiscal 2020.

The Company reported adjusted earnings per diluted share⁽¹⁾⁽²⁾ of \$0.80 for the second quarter of fiscal 2020, unchanged from the second quarter of fiscal 2019 and a decrease of 6 percent from \$0.85 of adjusted earnings per diluted share in the first quarter of fiscal 2020. In the second quarter of fiscal 2020, adjusted earnings exceeded earnings under U.S. generally accepted accounting principles (U.S. GAAP) by \$0.15 per diluted share, reflecting the reversal of \$16.8 million of net losses of consolidated investment entities and the Company's other seed capital investments, the add-back of \$1.8 million of management fees and expenses of consolidated investment entities, and the reversal of \$1.1 million of net excess tax benefits related to stock-based compensation awards. Earnings under U.S. GAAP exceeded adjusted earnings per diluted share by \$0.09 in the second quarter of fiscal 2019, reflecting the reversal of \$11.4 million of net gains of consolidated investment entities and other seed capital investments, the add-back of \$1.8 million of management fees and expenses of consolidated investment entities, and the reversal of \$0.3 million of net excess tax benefits related to stock-based compensation awards. In the first quarter of fiscal 2020, earnings under U.S. GAAP exceeded adjusted earnings by \$0.06 per diluted share, reflecting the reversal of \$3.6 million of net gains of consolidated investment entities and other seed capital investments, the add-

⁽¹⁾ Effective this quarter, the Company's calculation of non-U.S. GAAP financial measures excludes the impact of consolidated sponsored funds and consolidated collateralized loan obligation (CLO) entities (collectively, consolidated investment entities) and other seed capital investments. Adjustments to GAAP operating income include the add-back of management fee revenue received from consolidated investment entities that are eliminated in consolidation and the non-management expenses of consolidated sponsored funds recognized in consolidation. Adjustments to GAAP net income attributable to Eaton Vance Corp. shareholders include the after-tax impact of these adjustments to operating income and the elimination of gains (losses) and other investment income (expense) of consolidated investment entities and other seed capital investments included in non-operating income (expense), as determined net of tax and non-controlling and other beneficial interests. All prior period non-U.S. GAAP financial measures have been updated to reflect this change as shown in Attachments 2 and 3. Please see note 2 below.

⁽²⁾ Although the Company reports its financial results in accordance with U.S. GAAP, management believes that certain non-U.S. GAAP financial measures, specifically, adjusted net income attributable to Eaton Vance Corp. shareholders, adjusted earnings per diluted share and adjusted operating income, while not a substitute for U.S. GAAP financial measures, may be effective indicators of the Company's performance over time. Non-U.S. GAAP financial measures should not be construed to be superior to U.S. GAAP measures. In calculating these non-U.S. GAAP financial measures, net income attributable to Eaton Vance Corp. shareholders, earnings per diluted share and operating income are adjusted to exclude items management deems non-operating or non-recurring in nature, or otherwise outside the ordinary course of business. These adjustments may include, when applicable, the add back of closed-end fund structuring fees, costs associated with special dividends, debt repayments and tax settlements, the tax impact of stock-based compensation shortfalls or windfalls, and non-recurring charges for the effect of tax law changes. The adjusted measures also exclude the impact of consolidated investment entities and other seed capital investments. Management and our Board of Directors, as well as certain of our outside investors, consider the adjusted numbers a measure of the Company's underlying operating performance. Management believes adjusted net income attributable to Eaton Vance Corp. shareholders and adjusted earnings per diluted share are important indicators of our operations because they exclude items that may not be indicative of, or are unrelated to, our core operating results, and may provide a useful baseline for analyzing trends in our underlying business.

back of \$2.4 million of management fees and expenses of consolidated investment entities, and the reversal of \$4.9 million of net excess tax benefits related to stock-based compensation awards.

Consolidated net outflows of \$9.3 billion in the second quarter of fiscal 2020 represent -7 percent annualized internal growth in managed assets (consolidated net flows divided by beginning of period consolidated assets under management). This compares to net inflows of \$4.6 billion and 4 percent annualized internal growth in managed assets in the second quarter of fiscal 2019 and net inflows of \$6.1 billion and 5 percent annualized internal growth in managed assets in the first quarter of fiscal 2020. Excluding Parametric overlay services, the Company had net outflows of \$2.8 billion and -3 percent annualized internal growth in managed assets in the second quarter of fiscal 2020, net inflows of \$2.6 billion and 3 percent annualized internal growth in managed assets in the second quarter of fiscal 2019 and net inflows of \$5.0 billion and 5 percent annualized internal growth in managed assets in the first quarter of fiscal 2020.

The Company's annualized internal management fee revenue growth (management fees attributable to consolidated inflows less management fees attributable to consolidated outflows, divided by beginning of period consolidated management fee revenue) was -6 percent in the second quarter of fiscal 2020, 1 percent in the second quarter of fiscal 2019 and 5 percent in the first quarter of fiscal 2020.

During the second quarter of fiscal 2020, consolidated net flows varied considerably from month to month. The Company had net inflows of \$2.9 billion in February, net outflows of \$11.8 billion in March and net outflows of \$0.4 billion in April. Excluding Parametric overlay services, the Company had net inflows of \$2.4 billion in February, net outflows of \$5.4 billion in March and net inflows of \$0.2 billion in April. The Company's annualized internal management fee revenue growth was 5 percent in February, -23 percent in March and -2 percent in April.

Consolidated assets under management were \$465.3 billion on April 30, 2020, down 1 percent from \$469.9 billion of consolidated managed assets on April 30, 2019 and down 10 percent from \$518.2 billion of consolidated managed assets on January 31, 2020. The year-over-year decrease in consolidated assets under management reflects net inflows of \$14.6 billion and market price declines of \$19.3 billion. The sequential quarterly decrease in consolidated assets under management reflects net outflows of \$9.3 billion and market price declines of \$43.6 billion in the second quarter of fiscal 2020.

"Like all companies, Eaton Vance has been significantly affected by the COVID-19 pandemic," said Thomas E. Faust Jr., Chairman and Chief Executive Officer. "Nearly all of our staff has been working from home since mid-March, and will remain doing so for the foreseeable future. We continue to engage actively with clients and business partners, seeking to help them address their investment needs during this difficult period. Our financial results for the three months ended April 30, 2020 speak to both the challenges of operating in this time of extreme disruption and the great strengths and resilience of our business and culture."

Average consolidated assets under management were \$479.5 billion in the second quarter of fiscal 2020, up 5 percent from \$456.2 billion in the second quarter of fiscal 2019 and down 6 percent from \$509.9 billion in the first quarter of fiscal 2020.

As shown in Attachment 11, excluding performance-based fees, annualized management fee rates on consolidated assets under management averaged 29.7 basis points in the second quarter of fiscal 2020, down 7 percent from 31.8 basis points in the second quarter of fiscal 2019 and down 4 percent from 30.8 basis points in the first quarter of fiscal 2020. Changes in average annualized management fee rates for the compared periods primarily reflect shifts in the Company's mix of business.

Attachments 6 and 7 summarize the Company's consolidated assets under management and net flows by investment mandate and investment vehicle reporting categories. Attachments 8, 9 and 10 summarize the Company's ending consolidated assets under management by investment mandate, investment vehicle and investment affiliate. Attachment 11 shows the Company's average annualized management fee rates by investment mandate.

As shown in Attachments 6 and 7, consolidated sales and other inflows were \$61.6 billion in the second quarter of fiscal 2020, up 67 percent from \$36.8 billion in the second quarter of fiscal 2019 and up 33 percent from \$46.3 billion in the first quarter of fiscal 2020.

Consolidated redemptions and other outflows were \$70.9 billion in the second quarter of fiscal 2020, up 120 percent from \$32.2 billion in the second quarter of fiscal 2019 and up 76 percent from \$40.2 billion in the first quarter of fiscal 2020.

As of April 30, 2020, the Company's 49 percent-owned affiliate Hexavest Inc. (Hexavest) managed \$8.6 billion of client assets, down 38 percent from \$13.9 billion of managed assets on April 30, 2019 and down 34 percent from \$13.0 billion of managed assets on January 31, 2020. Hexavest had net outflows of \$2.2 billion in the second quarter of fiscal 2020, versus net inflows of \$0.2 billion in the second quarter of fiscal 2019 and net outflows of \$0.5 billion in the first quarter of fiscal 2020. Attachment 12 summarizes the assets under management and net flows of Hexavest. Other than Eaton Vance-sponsored funds for which Hexavest is the adviser or sub-adviser, the managed assets and flows of Hexavest are not included in our consolidated totals.

Second Quarter Fiscal 2020 vs. Second Quarter Fiscal 2019

In the second quarter of fiscal 2020, revenue decreased 1 percent to \$405.9 million from \$411.9 million in the second quarter of fiscal 2019. Management fees were down 1 percent, as a 7 percent decrease in consolidated average annualized management fee rates more than offset higher average consolidated assets under management and the impact of one additional fee day in the second quarter of fiscal 2020. Performance fees were \$2.5 million in the second quarter of fiscal 2020 and \$1.8 million in the second quarter of fiscal 2019. Collectively, distribution and service fee revenues were substantially unchanged from the second quarter of fiscal 2019.

Operating expenses were \$284.0 million in the second quarter of fiscal 2020, substantially unchanged from \$284.7 million in the second quarter of fiscal 2019, reflecting decreases in compensation and distribution expenses, partially offset by increases in service fee expense, amortization of deferred sales commissions,

fund-related expenses and other expenses. The decrease in compensation reflects lower operating income-based and investment performance-based bonus accruals, lower stock-based compensation expense and lower severance expenses, partially offset by higher sales-based incentive compensation and higher salaries associated with increases in headcount, year-end compensation increases for continuing employees and one additional payroll day in the second quarter of fiscal 2020. The decrease in distribution expense reflects lower Class C distribution fee payments and lower marketing and promotion costs, partially offset by an increase in up-front sales commission expense. The increase in service fee expense reflects higher private fund service fee payments, partially offset by lower Class C service fee payments. The increase in amortization of deferred sales commissions reflects higher private fund commission amortization, partially offset by lower Class C commission amortization. The increase in fund-related expenses reflects higher sub-advisory fees paid. Other operating expenses increased 7 percent, primarily reflecting increases in information technology spending and higher facilities expenses, partially offset by lower travel expenses, lower professional services expenses and a decrease in other corporate expenses.

Operating income decreased 4 percent to \$122.0 million in the second quarter of fiscal 2020 from \$127.2 million in the second quarter of fiscal 2019. The Company's operating margin decreased to 30.0 percent in the second quarter of fiscal 2020 from 30.9 percent in the second quarter of fiscal 2019. As shown in Attachment 3, on an adjusted basis including the management fee revenue and excluding the operating expenses of consolidated investment entities, operating income was down 4 percent year-over-year. Our adjusted operating margin decreased to 30.5 percent in the second quarter of fiscal 2020 from 31.4 percent in the second quarter of fiscal 2019.

Non-operating expense totaled \$73.4 million in the second quarter of fiscal 2020 versus \$20.3 million of non-operating income in the second quarter of fiscal 2019. The year-over-year change primarily reflects a \$65.7 million increase in net losses and other investment income of consolidated sponsored funds and the Company's investments in other sponsored strategies, a \$27.5 million increase in the net expenses of consolidated CLO entities and a \$0.5 million increase in interest expense. The increase in interest expense is attributable to borrowings under the Company's line of credit during the second quarter of fiscal 2020. Such borrowings were fully repaid prior to quarter-end.

The Company's effective tax rate, calculated as a percentage of income before income taxes and equity in net income of affiliates, was 45.3 percent in the second quarter of fiscal 2020 and 25.1 percent in the second quarter of fiscal 2019. Excluding the impact of consolidated investment entities and other seed capital investments and the net excess tax benefits associated with the Company's stock-based compensation plans, the Company's adjusted effective tax rate, calculated on the same basis, was 24.9 percent in the second quarter of fiscal 2020 and 26.9 percent in the second quarter of fiscal 2019. The Company's effective tax rate is discussed in greater detail under "Taxation" below.

Equity in net income of affiliates was \$1.5 million and \$2.7 million in the second quarters of fiscal 2020 and 2019, respectively, substantially all relating to the Company's investment in Hexavest.

As detailed in Attachment 4, net income (loss) attributable to non-controlling and other beneficial interests was \$(44.0) million in the second quarter of fiscal 2020 and \$11.3 million in the second quarter of fiscal 2019. The year-over-year change reflects a decline in income and gains (losses) of consolidated investment entities and other seed capital investments driven primarily by markdowns in position values to reflect securities price declines in the second quarter of fiscal 2020 and the Company's accelerated repurchase of certain profit and capital interests in Parametric entities held by current and former employees, which settled at the end of the fourth quarter of fiscal 2019.

The Company's weighted average basic shares outstanding were 109.2 million in the second quarter of fiscal 2020 and 110.4 million in the second quarter of fiscal 2019, a decrease of 1 percent. The year-over-year reduction reflects share repurchases in excess of new shares issued upon the vesting of restricted stock awards and the exercise of employee stock options. On a diluted basis, the Company's weighted average shares outstanding were 111.6 million in the second quarter of fiscal 2020 and 114.2 million in the second quarter of fiscal 2019, a decrease of 2 percent. The decline in weighted average diluted shares

outstanding further reflects a decrease in the dilutive effect of in-the-money options and unvested restricted stock awards due to lower market prices of the Company's shares.

Second Quarter Fiscal 2020 vs. First Quarter Fiscal 2020

In the second quarter of fiscal 2020, revenue decreased 10 percent to \$405.9 million from \$452.6 million in the first quarter of fiscal 2020. Management fees were down 10 percent, primarily reflecting a 6 percent decrease in average consolidated assets under management, a 4 percent decline in consolidated average annualized management fee rates and the impact of two fewer fee days in the second quarter of fiscal 2020. Performance fees were \$2.5 million in the second quarter of fiscal 2020 and \$0.2 million in the first quarter of fiscal 2020. Distribution and service fee revenues were collectively down 11 percent, reflecting lower managed assets in fund share classes that are subject to these fees.

Operating expenses decreased 11 percent to \$284.0 million in the second quarter of fiscal 2020 from \$317.8 million in the first quarter of fiscal 2020, reflecting decreases in compensation, distribution expense, service fee expense, fund-related expenses and other operating expenses, partially offset by an increase in amortization of deferred sales commissions. The decrease in compensation reflects lower operating income-based and investment performance-based bonus accruals, decreases related to seasonal benefit costs and payroll taxes that are recognized primarily in the first fiscal quarter, lower salary and benefit expenses driven by two fewer payroll days in the second fiscal quarter and a decrease in severance expenses, partially offset by higher sales-based incentive compensation. The decrease in compensation also reflects lower stock-based compensation expense driven by accelerated vesting of restricted stock awards and accelerated recognition of employee stock option expense in connection with employee retirements in the first quarter of fiscal 2020. The decrease in distribution expense reflects lower Class C distribution fee payments, lower marketing and promotion costs, lower intermediary marketing support payments and a decrease in up-front sales commission expense. The decrease in service fee expense reflects lower Class A and private fund service fee payments. The decrease in fund-related expenses reflects lower sub-advisory fees paid, offset in part by increases in fund expenses borne by the Company. Other operating expenses decreased 3 percent, primarily reflecting lower travel expenses and lower professional services expenses, partially offset by increases in information technology spending and higher facilities expenses. The increase in amortization of deferred sales commissions reflects higher private fund commission amortization.

Operating income decreased 9 percent to \$122.0 million in the second quarter of fiscal 2020 from \$134.7 million in the first quarter of fiscal 2020. The Company's operating margin increased to 30.0 percent in the second quarter of fiscal 2020 from 29.8 percent in the first quarter of fiscal 2020. As shown in Attachment 3, on an adjusted basis including the management fee revenue and excluding the operating expenses of consolidated investment entities, operating income was down 10 percent sequentially. Our adjusted operating margin increased to 30.5 percent in the second quarter of fiscal 2020 from 30.3 percent in the first quarter of fiscal 2020.

Non-operating expense totaled \$73.4 million in the second quarter of fiscal 2020 versus \$8.4 million of non-operating income in the first quarter of fiscal 2020. The sequential change reflects a \$66.6 million increase in net losses and other investment income of consolidated sponsored funds and the Company's investments in other sponsored strategies, a \$14.7 million increase in the net expenses of consolidated CLO entities and a \$0.5 million increase in interest expense. The increase in interest expense is attributable to borrowings under the Company's line of credit during the second quarter of fiscal 2020. Such borrowings were fully repaid prior to quarter-end.

The Company's effective tax rate, calculated as a percentage of income before income taxes and equity in net income of affiliates, was 45.3 percent in the second quarter of fiscal 2020 and 22.8 percent in the first quarter of fiscal 2020. Excluding the impact of consolidated investment entities and other seed capital investments and the net excess tax benefits associated with the Company's stock-based compensation plans, the Company's adjusted effective tax rate, calculated on the same basis, was 24.9 percent in the second quarter of fiscal 2020 and 27.6 percent in the first quarter of fiscal 2020. The Company's effective tax rate is discussed in greater detail under "Taxation" below.

Equity in net income of affiliates was \$1.5 million in the second quarter of fiscal 2020 and \$2.3 million in the first quarter of fiscal 2020, substantially all relating to the Company's investment in Hexavest.

As detailed in Attachment 4, net income (loss) attributable to non-controlling and other beneficial interests was \$(44.0) million in the second quarter of fiscal 2020 and \$8.9 million in the first quarter of fiscal 2020. The sequential change reflects a decline in income and gains (losses) of consolidated investment entities and other seed capital investments driven primarily by markdowns in position values to reflect securities price declines in the second quarter of fiscal 2020.

The Company's weighted average basic shares outstanding decreased to 109.2 million in the second quarter of fiscal 2020 from the 109.4 million in the first quarter of fiscal 2020. The sequential reduction reflects share repurchases in excess of new shares issued upon the vesting of restricted stock awards and the exercise of employee stock options. On a diluted basis, the Company's weighted average shares outstanding were 111.6 million in the second quarter of fiscal 2020 and 114.7 million in the first quarter of fiscal 2020, a decrease of 3 percent. The decline in weighted average diluted shares outstanding further reflects a decrease in the dilutive effect of in-the-money options and unvested restricted stock awards due to lower market prices of the Company's shares.

Taxation

The following table reconciles the U.S. statutory federal income tax rate to the Company's effective income tax rate:

	Three Months Ended		
	April 30, 2020	January 31, 2020	April 30, 2019
Statutory U.S. federal income tax rate	21.0 %	21.0 %	21.0 %
State income tax, net of federal income tax benefits	8.8	4.9	4.5
Net income attributable to non-controlling and other beneficial interests	16.7	(0.5)	(0.9)
Other items	1.0	0.8	0.7
Net excess tax benefits from stock-based compensation plans	(2.2)	(3.4)	(0.2)
Effective income tax rate	45.3 %	22.8 %	25.1 %

The Company's income tax provision for the second quarter of fiscal 2020, second quarter of fiscal 2019 and first quarter of fiscal 2020 includes \$0.9 million, \$0.7 million and \$1.3 million, respectively, of charges associated with certain provisions of the Tax Cuts and Jobs Act that took effect for the Company in fiscal 2019, relating principally to limitations on the deductibility of executive compensation.

The Company's income tax provision was reduced by net excess tax benefits related to stock-based compensation awards totaling \$1.1 million in the second quarter of fiscal 2020, \$0.3 million in the second quarter of fiscal 2019 and \$4.9 million in the first quarter of fiscal 2020.

The Company's calculations of adjusted net income and adjusted earnings per diluted share remove the impact of gains (losses) and other investment income (expense) of consolidated investment entities and other seed capital investments, add back the management fees and expenses of consolidated investment entities, and exclude the tax impact of stock-based compensation shortfalls or windfalls. On this basis, the Company's adjusted effective tax rate was 24.9 percent in the second quarter of fiscal 2020, 26.9 percent in the second quarter of fiscal 2019 and 27.6 percent in the first quarter of fiscal 2020. On the same adjusted basis, the Company estimates that its effective tax rate will be approximately 26.5 to 27.0 percent for the balance of fiscal 2020 and for the fiscal year as a whole. The Company's actual adjusted effective tax rate

for fiscal 2020 may vary from this estimate due to changes in the Company's tax policy interpretations and assumptions, additional regulatory guidance that may be issued and other factors.

The Company's adjusted effective tax rate is calculated by dividing our adjusted income tax expense by adjusted income before income taxes and equity in net income of affiliates, which was \$119.0 million in the second quarter of fiscal 2020, \$126.5 million in the second quarter of fiscal 2019 and \$134.3 million in the first quarter of fiscal 2020. Adjusted income before income taxes and equity in net income of affiliates does not include the allocation to non-controlling interests and removes the impact of gains (losses) and other investment income (expense) of the Company's consolidated investment entities and other seed capital investments and adds back the management fees and expenses of consolidated investment entities.

The following table reconciles income tax expense (benefit) to adjusted income tax expense (benefit):
