

Parametric Custom Core[®] Fundamental Developed International ADR

Benchmark: FTSE RAFI[®] Developed ex-US 1000 QSR

The Strategy

Parametric's Custom Core[®] Fundamental Developed International ADR portfolios with tax management seek to provide a client with exposure to alternatively weighted developed market excluding U.S. ADR equity securities while maximizing after-tax returns through a variety of tax management techniques. The strategy seeks to exceed its benchmark on an after-tax basis.

The Approach

Portfolio holdings are selected from a broad universe of eligible securities reflecting the desired overall exposure. Weightings of securities in the portfolio will not match nor replicate those of the benchmark and the portfolio may include securities not held in the benchmark. Tax management techniques including tax loss harvesting and the management of capital gains are used to minimize the impact of taxes and maximize after-tax return.

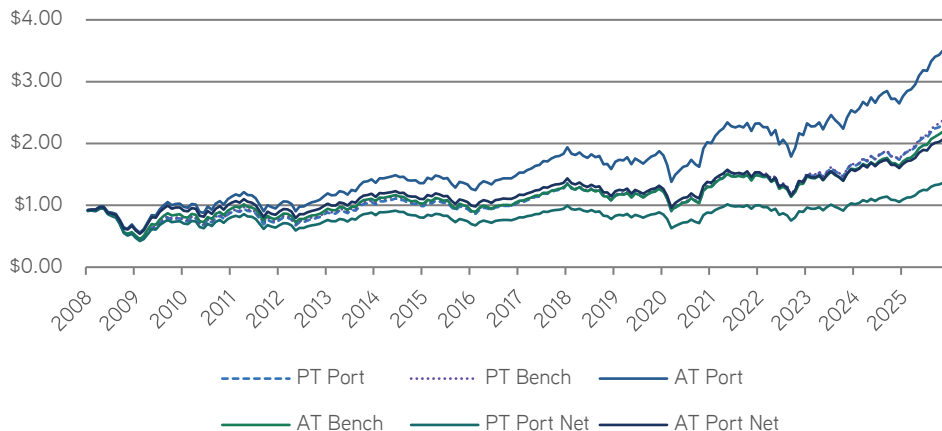

The Features

Custom Core[®] portfolios can be benchmarked to a variety of exposures and benchmark options differ by program. In addition, portfolios can be tailored to meet client objectives. Clients can choose to apply an industry or social screen. Portfolios can also be funded in kind and transitioned tax-efficiently.

Growth of a Dollar (as of 12/31/2025)

FUNDAMENTAL WEIGHTING MAY OUTPERFORM

Unlike market-cap weighted indexes, FTSE RAFI[®] portfolios incorporate the Fundamental Index[®] investment criteria. Assigning weights based on the size of a stock's financial footprint may help reduce the impact of price-distorting factors and provide a more objective representation of the market.

- Parametric Portfolio Associates LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Parametric Portfolio Associates LLC has been independently verified for the periods January 1, 2000, to December 31, 2024. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.
- Parametric Portfolio Associates LLC (the "Firm") is an investment advisor registered under the Investment Advisers Act of 1940. Parametric Portfolio Associates LLC provides rules-based investment management services to institutional investors, individual clients and commingled investment vehicles, including Systematic Alpha and Income Strategies, Custom Core, Centralized Portfolio Management ("CPM"), Customized Exposure Management ("CEM"), Volatility Risk Premium ("VRP"), Tax-Advantaged Bond Strategies (TABS), and Taxable Bond Strategies. The Firm has complied with the GIPS standards retroactive to January 1, 2000. Prior to July 1, 2019, the firm included only the Parametric Investment & Overlay Strategies. On July 1, 2019, the firm was redefined to include the Parametric Custom Tax-Managed & Centralized Portfolio Management Strategies. On January 1, 2020, the firm was redefined to include the Tax-Advantaged Bond Strategies (TABS), and Taxable Bond Strategies previously managed by Eaton Vance Management, an investment affiliate of Parametric's parent company, Eaton Vance Corporation. On May 1, 2023, the firm was redefined to include the Morgan Stanley Investment Management ("MSIM") Fixed Income Managed Solutions' strategies. For the purpose of complying with the GIPS standards, the Firm is defined and held out to the public as Parametric Portfolio Associates LLC. On March 1, 2021, Eaton Vance Management and its affiliates (which includes Parametric Portfolio Associates LLC) became wholly-owned, subsidiaries of Morgan Stanley. The Firm continues to operate as Parametric Portfolio Associates LLC.
- Pure gross-of-fees returns, presented as supplemental information, do not reflect the deduction of any trading costs, fees, or expenses. Pure gross-of-fees performance figures are time-weighted rates of return. Performance results reflect the reinvestment of dividends, interest income and other earnings. Performance results are expressed in U.S. dollars. Past performance is not an indication of future performance.
- Internal dispersion is based on the sample using the equal-weighted standard deviation of the annual pure gross returns of those portfolios that were included in the composite for the entire year. When the composite consists of five or fewer portfolios for the full year, no dispersion measure is presented. The three-year annualized standard deviation measures the variability of the composite pure gross returns, and the benchmark returns over the preceding 36-month period. A pure gross return is the return on investments that is not reduced by any transaction's costs incurred during the period.
- Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
- A list including composite descriptions and pooled funds descriptions for limited distribution pooled funds is available upon request.
- GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.
- The Parametric Tax-Managed Custom Core Fundamental Developed International ADR WRAP Composite measures the total return of all fully discretionary tax-managed and cash funded WRAP accounts that seek long-term capital appreciation by investing primarily in ADRs benchmarked to the FTSE RAFI Developed Ex U.S. QSR Index. Investing involves risk, including possible loss of principal. The value of investments held by the strategy may increase or decrease in response to economic, financial, and political events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. The equity investments are exposed to liquidity, credit, currency, and inflation risk. Trading volume, lack of a market maker or trading partners, large position size, market conditions, company-specific events or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments due to adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. Investment strategies that seek to enhance after-tax performance may be unable to fully realize strategic gains or harvest losses due to various factors. Market conditions may limit the ability to generate tax losses. Tax-loss harvesting involves the risks that the new investment could perform worse than the original investment and that transaction costs could offset the tax benefit. Also, a tax-managed strategy may cause a client portfolio to hold a security in order to achieve more favorable tax treatment or to sell a security in order to create tax losses.
- The standard wrap fee schedule in effect is 3.00% of total assets. Net of fees results are calculated by deducting a 3.00% annual fee to serve as the highest wrap fee charged. In addition to Parametric's management fees, the total wrap fees may represent commissions, portfolio monitoring, consulting services and custodial services charged by the wrap sponsor.
- The composite's benchmark is the FTSE RAFI Developed ex US QSR Index. The Index comprises the 1000 non US-listed companies with the largest RAFI fundamental scores selected from the FTSE Developed ex US Index. Index constituents are weighted using a composite of fundamental factors, including total cash dividends, free cash flow, total sales and book equity value. The Index returns are net of withholding taxes. The Index is unmanaged and does not incur management fees, transaction costs or other expenses associated with separately managed accounts in this style. It is not possible to directly invest in an index.
- Returns prior to January 1, 2019, were achieved from accounts managed by Parametric Custom Tax-Managed & Centralized Portfolio Management Strategies, therefore total firm assets for such periods are not applicable.

Disclosures

Parametric Portfolio Associates LLC ("Parametric"), headquartered in Seattle, is registered as an investment advisor with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Parametric is a leading global asset management firm, providing investment strategies and customized exposure management directly to institutional investors and indirectly to individual investors through financial intermediaries. Parametric offers a variety of rules-based investment strategies, including alpha-seeking equity, fixed-income, alternative and options strategies. Parametric also offers implementation services, including customized equity, traditional overlay and centralized portfolio management. Parametric is a part of Morgan Stanley Investment Management, the asset management division of Morgan Stanley and offers these capabilities through offices located in Seattle, Boston, Minneapolis, New York, and Westport. This material may not be forwarded or reproduced, in whole or in part, without the written consent of Parametric. Parametric and its affiliates are not responsible for its use by other parties.

This material may contain confidential and/or proprietary information, composite and/or account specific portfolio holdings, and/or assumptions based on dissimilar period comparisons, and may only be relied upon for this report. This is not an offer to buy or sell any security and does not include a complete list of all securities purchased or sold in the period or for all clients. Actual holdings will vary and there is no guarantee that any client will hold any mentioned positions. No security or discipline is profitable all of the time and there is always the possibility of loss. Returns presented were generated using Parametric's proprietary rules-based investment methodology as described in ADV Part 2A, are unaudited and may not correspond to any other published data. Parametric and Morgan Stanley are not tax consultants and do not provide tax advice. Clients should seek other professional assistance before investing. Investment risks may include but are not limited to: market, economic, political, interest rate, currency exchange, leverage, liquidity, credit quality, trading, and client specific restrictions.

Account Criteria

Accounts are fully discretionary. Accounts are included in a composite in first full month of management and excluded after the last full month of investment. Terminated accounts are retained in composites for the full period of investment.

After Tax Performance

When calculating after-tax returns, Parametric applies the client's individual tax rate (which may include federal and state income taxes), if provided by the client. If the individual tax rate is not provided by the client, Parametric applies the highest U.S. federal tax rates. For short-term gains, the highest U.S. federal marginal income tax rate is 37% plus the 3.8% net investment income tax, for a combined rate of 40.8%. For long-term gains, the highest U.S. capital gains tax rate is 20% plus the 3.8% net investment income tax, for a combined rate of 23.8%. These assumed tax rates are applied to both net realized gains and losses in the portfolio. Applying the highest rate may cause the after-tax performance shown to be different than an investor's actual experience. Investors' actual tax rates, the presence of current or future capital loss carry forwards, and other investor tax circumstances will cause an investor's actual after-

tax performance to be over or under Parametric's estimates presented here. In periods when net realized losses exceed net realized gains, applying the highest tax rates to our calculations illustrates the highest after-tax return that could be expected of the portfolio, and assumes the maximum potential tax benefit was derived. Actual client after-tax returns will vary. As with all after-tax performance, the after-tax performance reported here is an estimate. In particular, it has been assumed that the investor has or will have sufficient capital gains from sources outside of this portfolio to fully offset any net capital losses realized, and any resulting tax benefit has been included in Parametric's computation of after-tax performance.

Performance, cost basis, unrealized gain/losses, and realized gains/losses calculated and reported by Parametric may vary from official custodial statements based on different accounting procedures, reporting dates or valuation methodologies for certain securities. Client performance summaries and any related data produced by Parametric are not audited. Clients are encouraged to carefully review and compare the official custodial records with the various data and performance statistics reported by Parametric.

Benchmark after-tax returns are calculated for each client portfolio using client-specific, after-tax benchmark portfolios. Performance of the after-tax benchmark is calculated using the same inception date, cash flows, cost basis, and tax rates as the client portfolio. The after-tax benchmark's capital gain realization rate is based on the average turnover rate of the pretax benchmark and ending gain or loss of the after-tax benchmark for each period. The dividend income is estimated using the pretax benchmark index's dividend return during the period. After-tax benchmark returns reflect the deduction of taxes, but do not include any other fees or expenses. After-tax benchmark returns are estimates, do not reflect actual trading, and should not be relied on for investment decisions.

Tax alpha measures the impact of tax management on client accounts compared with the tax consequences of simply replicating the benchmark without regard to taxes. Tax alpha's main components are the before- and after-tax performance of client accounts and the benchmark. For client accounts, after-tax performance is based on actual realized gains and losses. For the benchmark, after-tax performance is based on the gains and losses the benchmark would have incurred due to index turnover and client-directed activity (such as withdrawals). See disclosures for additional information. The gross-of-fees (GoF) formula for calculating tax alpha is $\text{Tax AlphaGoF} = \text{AfterTax Excess ReturnGoF} - \text{BeforeTax Excess ReturnGoF}$. The net-of-fees (NoF) formula is $\text{Tax AlphaNoF} = \text{AfterTax Excess ReturnNoF} - \text{BeforeTax Excess ReturnNoF}$.

The Parametric Separately Managed Accounts are not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE"), by the London Stock Exchange Plc (the "Exchange"), The Financial Times Limited ("FT") or by Research Affiliates LLC ("RA") (collectively the "Licensor Parties") and none of the Licensor Parties make any warranty or representation whatsoever, expressly or impliedly, either as to the results to be obtained from the use of the FTSE RAFI Indexes (the "Indexes") and/or the figure at which the Indexes stand at any particular time on any particular day or otherwise. The Indexes are compiled and calculated

by FTSE in conjunction with RA. None of the Licensor Parties shall be liable (whether in negligence or otherwise) to any person for any error in the Index and none of the Licensor Parties shall be under any obligation to advise any person of any error therein.

"FTSE®" is a trademark of the Exchange and the FT, "Research Affiliates" and "Fundamental Index" are trademarks of RA, and all such trademarks are used by FTSE under license.

"MSCI" and MSCI Index names are service marks of MSCI Inc. ("MSCI"). Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent. Investments are subject to change without notice. All information is believed to be correct, but accuracy cannot be guaranteed.

There is no assurance that a separately managed account ("SMA") will achieve its investment objective. SMAs are subject to market risk, which is the possibility that the market values of the securities in an account will decline and that the value of the securities may therefore be less than what you paid for them. Market values can change daily due to economic and other events (e.g., natural disasters, health crises, terrorism, conflicts and social unrest) that affect markets, countries, companies or governments. It is difficult to predict the timing, duration, and potential adverse effects (e.g., portfolio liquidity) of events. Accordingly, you can lose money investing in an SMA.

Investment strategies that seek to enhance after-tax performance may be unable to fully realize strategic gains or harvest losses due to various factors. Market conditions may limit the ability to generate tax losses. Tax-loss harvesting involves the risks that the new investment could perform worse than the original investment and that transaction costs could offset the tax benefit. Also, a tax-managed strategy may cause a client portfolio to hold a security in order to achieve more favorable tax treatment or to sell a security in order to create tax losses. Prospective investors should consult with a tax or legal advisor before making any investment decision.
